

NDA and non-circumvention

Version 1.0

- Keep the parcel, the mine and the price confidential.
- Deal through tx*. For 24 months you will not go around an introduction.
- The fee follows the introduction if the contract closes.

Txfers Pte. Ltd. (in formation) introduces the parties on txore. The text below is the confidentiality and non-circumvention agreement for this lane.

1. Confidential information. "Confidential Information" means all information disclosed through txore about a parcel, including identity, mine name and seller name, specifications, pricing and the fact that a parcel may be for sale.
2. Use and disclosure. You will use Confidential Information solely to evaluate a possible transaction and will not disclose it except to advisers who need to know it and are bound by confidentiality.
3. Non-circumvention. For 24 months after an introduction you will not knowingly deal with that counterparty about that parcel except through tx*.
4. Fee. If you close a transaction introduced through a mandate, the success fee shown on the lane is due on closing. The mandate deposit is credited against that fee.
5. No agency. tx* introduces parties. It is not a party to the sale.
6. Screening. tx* may decline or pause a mandate or an introduction where sanctions or ownership is unclear. A cleared status is a staff decision, not a warranty.
7. Version. The version stamped on the acceptance record is the text that was hashed.
